

EMINENT 2017

Our school was invited to the opening of the event **EMINENT 2017: Learning Spaces, Time and Eco-systems**, with students. We had the participation of 7 students: 5 Secondary students and 2 Primary students This event engaged participants in important discussions on space and technology as learning agents and innovative learning eco-systems, as well as featured the voices of students as digital learners and citizens engaged in learning labs. Delegations consisted of representatives of Ministries of Education from more than 30 countries, together with other education stakeholders from across Europe.

Kertu, Topias, Tina , Alexander, Andre', Tuva and Joakim were the best ambassadors a school could ever wish.

Thanks to all who made possible this activity.

Carla Valentim
